

Single RampSink

Makers of NuCrete™
The World's Only Stainless Concrete

The RampSink is Perhaps the Most Versatile of Our CounterSinks

With this enigmatic creation, water flows down the ramp and vanishes into an obscured slot drain. The geometric lines of the RampSink make it a natural selection for the most contemporary of buildings or homes. In natural tones, these sinks are reminiscent of Tuscan laundry sinks, and the overall shape begs pairing with our WaterBridge or e-Motion faucets.

Color, faucet placement and countertop area can be modified to meet your requirements. RampSinks can be made to "float" between walls or fit on conventional cabinetry.

- As a single basin, twin or double configuration.
- In Classic Concrete, diamond sanded, sealed and waxed or stainless NuCrete™.
- No visible hardware, slot drain replaces traditional drain.
- Can be mounted on standard cabinetry or "floated" between walls.
- Custom-made in a wide selection of colors.
- Models are available for commercial application.
- All are ADA-compliant and are IAPMO listed.
- 877.283.1897

Double RampSink

Makers of NuCrete™
The World's Only Stainless Concrete

The RampSink is Perhaps the Most Versatile of Our CounterSinks

With this enigmatic creation, water flows down the ramp and vanishes into an obscured slot drain. The geometric lines of the RampSink make it a natural selection for the most contemporary of buildings or homes. In natural tones, these sinks are reminiscent of Tuscan laundry sinks, and the overall shape begs pairing with our WaterBridge or Streamliner faucets.

P-Series RampSink

Makers of NuCrete™
The World's Only Stainless Concrete

Our P-Series sinks are available separately or on stands, crafted in powder-coated steel or in genuine hardwood, with natural or disressed finish. They can also span between three walls and become ADA compliant.

With this enigmatic creation, water flows down the ramp and vanishes into an obscured slot drain. The geometric lines of the RampSink make it a natural selection for the most contemporary of buildings or homes. In natural tones, these sinks are reminiscent of Tuscan laundry sinks, and the overall shape simply begs pairing with our WaterBridge or Streamliner faucets. Only 35 inches wide, the P-Series Wave can rest on one of our hardwood or powder-coated steel stands - or span between three walls and become ADA compliant.
