

Metal Crete™

Genuine Soft-Metal Finishes On EarthCrete Sustainable Concrete, Only from Sonoma Cast Stone

SONOMA CAST STONE
INNOVATION IN CONCRETE

MetalCrete™

GENUINE SOFT-METAL FINISHES
ON EARTHCRETE SUSTAINABLE CONCRETE
ONLY FROM SONOMA CAST STONE

After much research we have found a method of permanently embedding metal powder into our concrete surfaces.

Unlike our stain proof NuCrete™, the surface on our MetalCrete™ products is a “living finish”.

These genuine, soft-metal finishes age in the most alluring way, and what emerges over time is the authentic character of an old-world country tavern.

Metal Crete™

GENUINE SOFT-METAL FINISHES
ON EARTHCRETE SUSTAINABLE CONCRETE
ONLY FROM SONOMA CAST STONE

This is real Copper, Pewter, Bronze, and Iron, and they are all “soft” metals.

As such, they will develop a patina of wear and staining which will increase the value of the fixture and make it literally irreplaceable, as would be an antique painting or a favorite pair of jeans.

This is not as noticeable with wall cladding, only something you see on countertop and sink surfaces.
